JOHN CHRISTAN J

Python Django Full Stack Developer

Colachel, Kanyakumari, India | +91 7904742144 | christon236@gmail.com | linkedin.com/in/john-christan | Portfolio

Open to relocation anywhere in India | Immediate joiner

PROFESSIONAL SUMMARY

Python Django Full Stack Developer with internship experience building and maintaining production web applications using Python, Django, Django REST Framework, React, JavaScript and MySQL. Skilled in REST API development, relational database design, authentication, debugging and responsive UI development. Delivered role-based management systems, automated PDF generation and a dynamic corporate website in Git-based Agile teams. Open to relocation across India and available to join immediately.

TECHNICAL SKILLS

Languages	Python, JavaScript
Backend	Django, Django REST Framework, REST APIs, Authentication & Authorisation, Django ORM
Frontend	React, HTML5, CSS3, Bootstrap, Responsive Web Design
Databases	MySQL, SQLite
Tools	Git, GitHub, VS Code, Postman
Practices	Debugging, API Integration, Code Review, Agile Collaboration, Deployment

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern — **Jun 2026 – Aug 2026**
Geosys IT Solutions Pvt Ltd — *Trivandrum, India*

- Developed and maintained features for a live web application using Python, Django, React and MySQL.
- Built and integrated REST API endpoints connecting Django backend services to React frontend components, working alongside senior developers.
- Debugged issues across backend and frontend layers and contributed to performance optimisation; followed Git branching, pull request and code review workflows.

Python Full Stack Developer Intern — **Nov 2025 – May 2026**
Luminar Technolab — *Trivandrum, India*

- Completed a six-month full stack programme covering Python, Django, REST APIs, JavaScript, React and MySQL.
- Built CRUD web applications using Django models, views, templates and ORM queries against relational databases.
- Implemented REST API endpoints for frontend–backend data exchange, tested with Postman, and built responsive interfaces with HTML5, CSS3 and Bootstrap.

Quality Inspector — **Dec 2023 – Oct 2025**
Hyoseong Electric India Limited (Automobile) — *Chennai, India*

- Performed in-process and final quality inspections on automotive components and maintained accurate inspection records supporting traceability and corrective action.

Machine Operator — **Aug 2022 – Oct 2023**
Shree Abhirami Engineering Works — *Chennai, India*

- Operated production machinery to specification with a focus on precision, process compliance, quality and safety.

PROJECTS

Geosys Corporate Website
Python • Django • React • MySQL • REST APIs

- Developed a fully dynamic, responsive corporate website with reusable React components and Django-backed content management, exposed through REST API endpoints.
- Created animation-rich interfaces and optimised responsive layouts for consistent performance on desktop and mobile.

ENTRIX – Gym Management System
Python • Django • JavaScript • Bootstrap • MySQL

- Built a role-based system with separate Admin, Trainer and Member access covering members, trainers, plans and attendance.
- Integrated biometric device input to automate attendance capture at the gym entrance, replacing manual registers.

Quotation Management System
Python • Django • JavaScript • Bootstrap • MySQL

- Developed an industrial quotation platform with product management, staff accounts and role-based permissions for bulk quotation creation.
- Implemented automated PDF quotation generation with download and WhatsApp sharing, cutting quotation turnaround to minutes.

EDUCATION & CERTIFICATIONS

Diploma in Electrical and Electronics Engineering — 74% — **April 2022**
Government Polytechnic College — *Nagercoil, India*

- **Certifications:** Python, REST API and SQL — HackerRank; Python, SQL and CSS — One Roadmap.

Languages: English, Tamil, Malayalam.
